

The **C360** is the first Fiilex product designed specifically for use with standard pipe-clamps, making it perfect for small-to-medium studios that require a versatile, broadcast-quality lighting solution. Its design also includes an integrated power supply, greatly simplifying overhead cable management.

Each fixture is also RJ45 DMX512 compatible, allowing users to operate them remotely via the Fiilex DMX Controller or any standard DMX board.

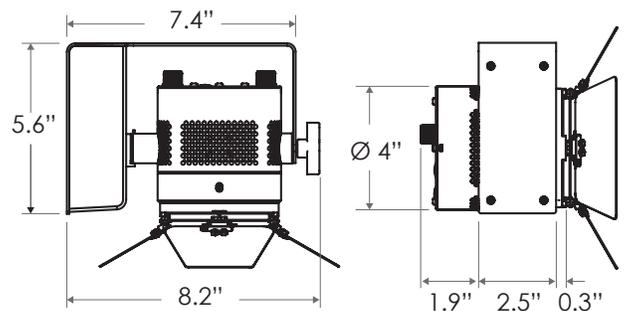

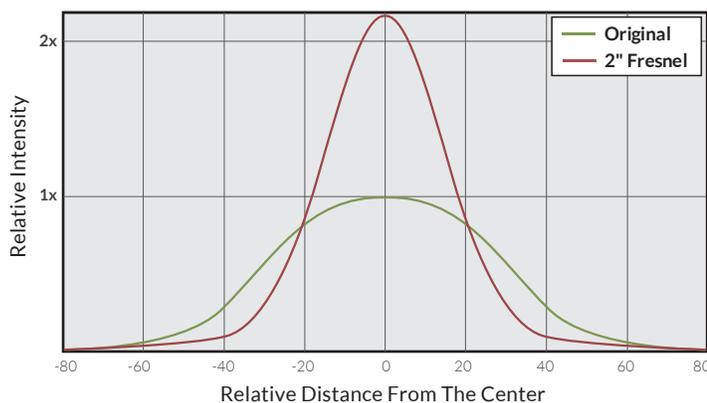

In addition to being extremely low-profile, these 85W lights boast many of the same advanced control features of the Fiilex second generation P-Series, including wide-gamut color tuning, full dimming, and hue adjustment. At every setting these lights maintain excellent CRI (95 Typical).

FEATURES

- DMX controllable (3-CH: intensity, CCT, hue)
- Dims to 0% without flicker or color shift
- 2800-6500K continuous CCT tuning
- High CRI values at every color temperature
- ± 0.25 green/magenta adjustment
- Precise color calibration for consistent quality
- 300W tungsten output (85W draw)
- Designed for use with standard pipe-clamps
- Less than 8" of clearance required
- Lightweight (less than 4 lbs with AC power cable)
- Integrated power supply
- Optional light modifiers available
